

MEMBER OF

## ASOCIACION NACIONAL AUTOMOVILISTICA ANA AUTOMOVIL CLUB A.C.

### SUSTAINABILITY POLICY.

ANA Automóvil Club A.C. - recognizes that its operations in the club's main office have the potential to generate both positive and negative environmental, social and economic impacts.

Therefore, we will develop and operate systems, strategies and work programs that provide for the protection of the environment, taking into account the budget available to the club. The goal is to decrease our negative impacts in a sustainable way as well as a commitment to satisfy all applicable legal requirements as necessary. With this policy, we will measure our progress and continually improve whenever possible.

Our purpose is to improve the quality and enjoyment of both office work, taking care of resources, and being an example for the population by implementing actions that lead us to achieve sustainable mobility. Also recognizing that future global objectives in relation to climate change are met, addressing specific issues such as waste management, energy and water, always following the values that we carry as a club.

We periodically review and evaluate our values to ensure that these principles are applied, and our goal as a club is to operate with international standards for environmental control and improvement and sustainability.

In Mexico, there are multiple levels of sporting events, from high-profile F1, NASCAR, Formula E, F4, among many others. We as a club, through the dissemination of information and club projects, plan to operate using the general objectives of sustainable development mentioned below:

- Monitor and measure the performance of our daily operations in order to minimize our environmental and social impacts;
- Minimize waste and evaluate their recovery and recycling;
- Encourage employees, customers, suppliers, members, allied companies, and the population of Mexico to recognize their respective obligations regarding environmental protection and continuous improvement, including the supply chain, to effectively meet our common sustainability goals;
- Document, implement, and maintain systems to monitor and evaluate performance against environmental standards and club procedures;

We seek to meet our objectives through the inclusion of staff and a clear definition of responsibilities and actions. Goals have been set so that we can effectively monitor our progress and measure our success.

Demonstrating the commitment to sustainability in the club offices and working with our members and the general population and raising awareness about sustainable mobility is very important for ANA Automóvil Club A.C. and has the full support and backing of the president.

Authorized by:

Ing. Julián J. Abed  
President of ANA Automóvil Club A.C.

Date: 28/10/2021

NOTE: This policy will be reviewed annually and shared with all of our staff, stakeholders, members, and the general public.
